KitchenAid®
FOR THE WAY IT'S MADE.®

Bottom Mount Refrigerator

PRODUCT MODEL NUMBERS

KRFC302E

Electrical: A 115 volt, 60 Hz, AC only 15- or 20-amp fused, grounded electrical supply is required. It is recommended that a separate circuit serving only your refrigerator and approved accessories be provided. Use an outlet that cannot be turned off by a switch. Do not use an extension cord.
Water: A cold water supply with water pressure of between 35 and 120 psi (241 and 827 kPa) is required to operate the water dispenser and ice maker. If you have questions about your water pressure, call a licensed, qualified plumber.

Reverse Osmosis Water Supply: IMPORTANT: The pressure of the water supply coming out of a reverse osmosis system going to the water inlet valve of the refrigerator needs to be between 35 and 120 psi (241 and 827 kPa).

PRODUCT DIMENSIONS
Model Size	Height - Overall "A"	Height - Top of Cabinet "B"	Depth - Doors Open 90° "C"	Depth - Drawer Open "D"	Depth - With Handles "E"	Depth - Without Handles "F"	Depth - Cabinet Only "G"	Width - Cabinet "H"
21.9	72" (182.9 cm)	71⅜" (181.3 cm)	44⅛" (112.1 cm)	45¼" (114.9 cm)	30¼" (76.8 cm)	27¾" (70.5 cm)	24⅝" (62.5 cm)	35¾" (90.8 cm)

LOCATION REQUIREMENTS

½" (1.25 cm)

2½" (6.3 cm)

IMPORTANT: This refrigerator is designed for indoor, household use only.

To ensure proper ventilation for your refrigerator, allow for ½" (1.25 cm) of space on each side and at the top. Allow for 1" (2.54 cm) of space behind the refrigerator. If your refrigerator has an ice maker, allow extra space at the back for the water line connections. When installing your refrigerator next to a fixed wall, leave 2½" (6.3 cm) minimum on the hinge side (some models require more) to allow for the door to swing open.

NOTE: This refrigerator is intended for use in a location where the temperature ranges from a minimum of 55°F (13°C) to a maximum of 110°F (43°C). The preferred room temperature range for optimum performance, which reduces electricity usage and provides superior cooling, is between 60°F (15°C) and 90°F (32°C). It is recommended that you do not install the refrigerator near a heat source, such as an oven or radiator.

Dimensions are for planning purposes only. For complete details, see Installation Instructions packed with product. Specifications subject to change without notice.

KitchenAid® 30" (76.2 cm) Slide-in Gas Range

PRODUCT MODEL NUMBERS

KSGB900E   KSGG700E

GAS SUPPLY REQUIREMENTS

Gas supply line:

- Provide a gas supply line of ¾" (1.9 cm) rigid pipe to the range location. A smaller size pipe on longer runs may result in insufficient gas supply. With LP gas, piping or tubing size can be ½" (1.3 cm) minimum. Usually, LP gas suppliers determine the size and materials used in the system.
 **NOTE:** Pipe-joint compounds that resist the action of LP gas must be used. Do not use TEFLON®† tape.

Flexible metal appliance connector:

- If local codes permit, a new CSA design-certified, 4 to 5 ft (122 to 152.4 cm) long, ½" (1.3 cm) or ¾" (1.9 cm) I.D., flexible metal appliance connector may be used for connecting range to the gas supply line.

- A ½" (1.3 cm) male pipe thread is needed for connection to the female pipe threads of the inlet to the appliance pressure regulator.

- Do not kink or damage the flexible metal tubing when moving the range.

- Must include a shutoff valve:
  The supply line must be equipped with a manual shutoff valve. This valve should be located in the same room but external to the range opening, such as an adjacent cabinet. It should be in a location that allows ease of opening and closing. Do not block access to shutoff valve. The valve is for turning on or shutting off gas to the range.
A. Gas supply line
B. Shutoff valve "open" position
C. To range

Gas Pressure Regulator

The gas pressure regulator supplied with this range must be used. The inlet pressure to the regulator should be as follows for proper operation:

Natural gas:
Minimum pressure: 5" WCP
Maximum pressure: 14" WCP

LP gas:
Minimum pressure: 11" WCP
Maximum pressure: 14" WCP

Contact local gas supplier if you are not sure about the inlet pressure.

PRODUCT DIMENSIONS

This manual covers several models. Your model may appear different from the models depicted. Dimensions given are maximum dimensions across all models.

A. 1 ³⁄₁₆" (3.0 cm) height from cooktop to top of vent
B. 29 ⅞" (75.9 cm)
C. Model/serial number plate (located behind the oven door on the top right-hand side of the oven frame)
D. 36" (91.4 cm) height to top of cooktop edge with leveling legs screwed all the way in*

E. 28 ⁵⁄₁₆" (71.9 cm) max. depth from front of console to back of range.
F. 28 ⅞" (73.3 cm) max. depth from handle to back of range.

IMPORTANT: Range must be level after installation. Follow the instructions in the "Level Range" section. Using the cooktop as a reference for leveling the range is not recommended.

*Range can be raised approximately 1" (2.5 cm) by adjusting the leveling legs.

Type of Gas

Natural gas:

- This range is factory set for use with Natural gas. See "Gas Conversions" section. The model/serial rating plate located behind the control panel has information on the types of gas that can be used. If the types of gas listed do not include the type of gas available, check with the local gas supplier.

LP gas conversion:

Conversion must be done by a qualified service technician.

No attempt shall be made to convert the appliance from the gas specified on the model/serial rating plate for use with a different gas without consulting the serving gas supplier. See "Gas Conversions" section.

†®TEFLON is a registered trademark of E.I. Du Pont De Nemours and Company.

Dimensions are for planning purposes only. For complete details, see Installation Instructions packed with product. Specifications subject to change without notice.

Ref. W10665256E
8/15

ELECTRICAL REQUIREMENTS

IMPORTANT: The range must be electrically grounded in accordance with local codes and ordinances, or in the absence of local codes, with the National Electrical Code, ANSI/NFPA 70 or Canadian Electrical Code, CSA C22.1.

If codes permit and a separate ground wire is used, it is recommended that a qualified electrical installer determine that the ground path is adequate.

- A 120 volt, 60 Hz., AC only, 15-amp fused, electrical circuit is required. A time-delay fuse or circuit breaker is also recommended. It is recommended that a separate circuit serving only this range be provided.
- Electronic ignition systems operate within wide voltage limits, but proper grounding and polarity are necessary. Check that the outlet provides 120-volt power and is correctly grounded.

CABINET OPENING DIMENSIONS

Cabinet opening dimensions shown are for 25" (64.0 cm) countertop depth, 24" (61.0 cm) base cabinet depth and 36" (91.4 cm) countertop height.

IMPORTANT: If installing a range hood or microwave hood combination above the range, follow the range hood or microwave hood combination installation instructions for dimensional clearances above the cooktop surface.

Range may be installed next to combustible walls with zero clearance.

NOTE: When installed in a slide-in cutout, the front of oven door may protrude beyond the base cabinet.

A. 18" (45.7 cm) upper side cabinet to countertop
B. 13" (33 cm) max. upper cabinet depth
C. 30" (76.2 cm) min. opening width
D. For minimum clearance to top of cooktop, see NOTE*.
E. In U.S.A.: 30" (76.2 cm) min. opening width
   In Canada: 31" (78.7 cm) min. opening width
F. 3" (7.6 cm) min. clearance from both sides of range to side wall or other combustible material.
G. The shaded area is recommended for installation of rigid gas pipe and grounded outlet.
H. 13 1/8" (33.3 cm)
 I. 7 11/16" (19.5 cm)
 J. 4 13/16" (12.2 cm)
K. 3 11/16" (9.4 cm) or measurement of N, whichever is greater
 L. 12" (30.5 cm)
M. Cabinet door or hinges should not extend into the cutout.
 N. Remaining counter depth should not exceed 2 1/4" (5.7 cm)

*NOTE: 24" (61.0 cm) minimum when bottom of wood or metal cabinet is shielded by not less than 1/4" (0.64 cm) flame retardant millboard covered with not less than No. 28 MSG sheet steel, 0.015" (0.4 mm) stainless steel, 0.024" (0.6 mm) aluminum or 0.020" (0.5 mm) copper.

30" (76.2 cm) minimum clearance between the top of the cooking platform and the bottom of an uncovered wood or metal cabinet.

VCIN36GWS
36-INCH CUSTOM INSERT
PROFESSIONAL® SERIES

Thermador

CSA UL Home Connect
FEATURES & BENEFITS

- Revel in creative freedom with Professional® Series custom inserts that can blend in with cabinetry or make a bold statement
★- Equipped with the Thermador Connected Experience by Home Connect™
- Powerfully Quiet® system accepts integral, inline, and remote blowers
- Beautiful illumination with multi-level, vivid LED lights
- Features automatic mode, delay shut-off, and check filter light

ACCESSORIES (OPTIONAL)

25 ft. Blower Connector Cable - EXTNCB25W

For use with the following inline and remote blowers: VTR1FZ, VTR2FZ, VTI1FZ, VTI2FZ

Roofplates

RFPLT600P - For use with 600 CFM remote blower VTR1FZ

RFPLT1000P - For use with 1000 CFM remote blower VTR2FZ

VCIN Trim Notes

NOTE: VCIN_GWS series custom insert models include hood trim pieces to complete the installation.

Remote Control Panel

REMCPW - Ability to vertically install on cabinetry or wall to control hood in a convenient location

7" (178 mm)

2 ¹/₂" (63.5 mm)

Note: Cutout required on left or right cabinet wall, depending on location of water inlet, drain and electrical connection

3-prong power cord included

Example of an Electrical Receptacle Installation

# 24" Custom Panel Dishwasher

800 Series – Custom Panel SHV78CM3N

Installation Details

Note: Plumbing installations will vary - refer to local codes. Drain hose included is 79" (201 cm) and can be extended to a maximum of 155 3/4" (396 cm).

Always use the approved drain hose extension kit (SGZ1010UC).

Ensure a portion of the drain hose is raised between min. 33" (84 cm) and max. 43" (110 cm) above the cabinet floor.
